

# Customer Success Story Leading Credit Scoring Company

## QUICK FACTS

### INDUSTRY

Financial Services

### PRODUCT

Credit scoring, decision management tools and applications

### APPLICATION

Data loss prevention for files shared via Box Enterprise

### CIPHERCLOUD® PRODUCT

CipherCloud for Box

## CHALLENGES AND OPPORTUNITIES

- Managing risk of data leakage from data cloud collaboration tools
- Ability of end-users to share data to anyone without safeguards
- Concerns about data, residency, and regulatory compliance and avoiding high-profile breaches

## OBJECTIVES

- Allow collaboration via Box, while protecting against data breaches
- Deploying a solution that is specifically tailored for Box
- Requires real-time and on-demand scanning of any folders or files
- Visibility and reporting on user activity for compliance

## WHY CIPHERCLOUD

- Seamless integration with Box
- Integration with third-party enterprise DLP systems
- Leadership in emerging Cloud Information Protection market

## IMPLEMENTATION HIGHLIGHTS

- CipherCloud for Box
- Real-time and on-demand scanning for Box Enterprise users
- Support for global workforce from any browser or device

## BENEFITS

- Preventing sensitive or regulated data from leaking through Box
- Enhanced visibility into Box usage and violations for all corporate users
